ROPE HOISTS  
Star 200 Standard  
Star 250 Comfort

For easy material transport  
even under difficult conditions.

**The ideal partner for any kind of high-level transport on building structures**

The light-weight swivel arm hoists can be mounted at any position on the structure. Whether on the scaffold, at a window, between floors or on the roof – these hoists are quick and easy to use even under tough conditions.

A maximum working height of up to 50 m is possible.

The wide range of well thought-out fixtures and practical load carrying devices permit universal use of this reliable equipment. Assembly can also be carried out by one person as the electric winch can be separated from the swivel arm.

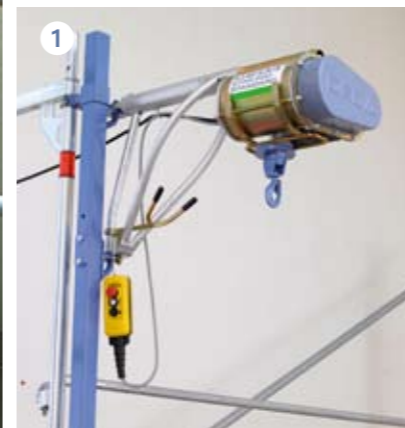

► **Technical data**

**GEDA Star 200 Standard**

Load capacity	200 kg
Lifting height	25/50 m
Rope length	26/51 m
Electrical power supply	230 V/1 kW/1x16 A
Lifting speed	22 m/min.

**GEDA Star 250 Comfort**

Load capacity	250 kg
Lifting height	25/50 m
Rope length	26/51 m
Electrical power supply	230 V/1 kW/1x16 A
Lifting speed	28 m/min.

► **Fixture types**

- ① Convenient scaffold clamp
- ② Free-standing tripod with ballast container for flat roofs and open floors
- ③ Floor to ceiling tie for narrow windows, stairwells, etc.

**Numerous load carrying devices ...**

... make it easy to transport construction materials such as gravel, plaster boards, decorators' paint, bricks, etc.! And thanks to the large range of different load carrying devices, you'll have no problem transporting scaffold components/parts and construction tools of all types.
