

## DER GEDA AkkuLeiterLIFT THE GEDA BatteryLadderLIFT

Das Gerät funktioniert dank modernster Akkutechnik vollkommen kabellos. Per Knopfdruck befördert eine handliche Winde ein Materialsystem verschiedenster Materialien bis auf die Stockwerke war gestern.

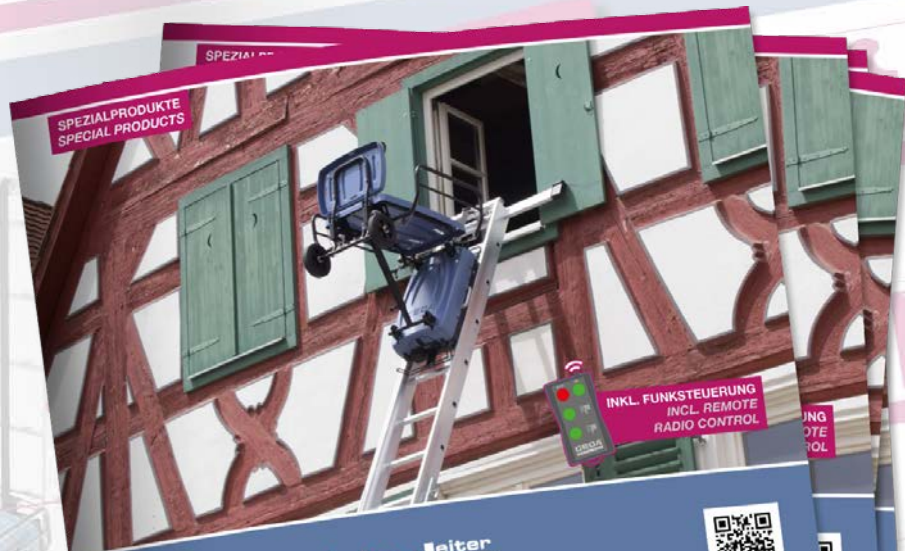

Li-Ion

**BROWSE NOW**

The real highlight is that thanks to state-of-the-art battery technology the device operates totally wirelessly. With just one touch of a button a manual winch transports a wide range of materials via a ladder system to heights up to 10 m. The remote radio control sets the compact device in motion then the GEDA BatteryLadderLIFT easily sweeps 120 kg into the air. All that exhausting - dragging up to those top floors is now consigned to the past!
